

CRGI SNAPSHOT

Title

Author(s)

Depending on the research topic, please include relevant sections in the summary:

Keywords: Provide 5-9 keywords that pertain to the Snapshot.

Background

Introduce the research/evaluation topic (e.g., seniors and mental health) and why it is important.

Objectives

Outline the purpose and/or objectives of your research/evaluation project. Clearly state your research/evaluation question(s).

Method

Describe the approach used to answer your research/evaluation question(s). This should include sampling technique and size, procedures, measures, and data analysis method.

Results

Outline findings obtained by using the above method.

Conclusions

Briefly describe resulting interpretation(s) and implication(s) (e.g., policy/practice, need for specific type of follow-up research).

Lessons Learned

Highlight any lessons learned from your research/evaluation project. For example, in conducting your project, you may have learned that a certain strategy encouraged persons with disabilities to participate in your project.

References

Provide a list of references for any literature used to produce the one-page summary. If this is an executive summary of a full report, please provide the URL where the full report can be accessed.
